ABSTRACT

This report is a photographic study of this ground force installation and provides the following data:

- A. Delineation of installation - boundaries
- B. Identification of functional areas
- C. Measurements of all buildings within the installation

INTRODUCTION

The following alphabetical designators are used to identify functional areas within military installations:

- A. Billeting area
- B. Vehicle storage/maintenance area
- C. General storage area
- D. Ammunition storage area
- E. Miscellaneous areas (hospitals, prisons, POL, personnel training facilities)
- F. Small-arms range
- G. Driver-training area
- H. Support area
- J. Tank/assault-gun revetments
- K. Automatic weapons range
- L. Subcaliber range
- M. APC range
- N. Combined-arms range
- P. Artillery training area
- Q. Infantry training area
- R. Special or unidentified area

The absence of one or more alphabetical designators indicates that those functional areas were not observed at that particular installation.

Lower case letters (e.g., Ba) are used to identify more than one area of a particular functional category.

This report is published as an interim Basic Imagery Interpretation Report with the concurrence of the Defense Intelligence Agency.
